

GROUND MASTER 200 – 400 RADARS

Ground Master radars 200 and 400 are multi-mission 3D air surveillance radars, tactical medium-range (~200 km) with the GM200 and fixed or mobile long-range (~400 km) with the GM400.

Missions

- Protection of national airspace or theaters of operation for the tactical version
- Tactical 3D multi-mission medium-range air surveillance (GM 200)
- 3D long-range air surveillance (GM 400)
- Detection and identification of aerial targets
- Adapted to surface-to-air weapon designation (GM200)

Major advantages

- Encompasses new aerial threats flying at high and low altitude, and a variety of speed, including RAM
- S-band Fully digital radar with windfarm filter
- High level of availability and reliability
- Highly mobile with a single ISO 20ft shelter (air-transportable, transportable on a carrier truck on off-road conditions for the GM200)

- Part of the SCCOA program for the protection of national airspace and on operation theatre.
