

MAMBA-SAMP AIR-DEFENCE MISSILE SYSTEM

The SAMP-MAMBA system (Ground-to-Air medium range / ground) is capable of engaging all-round 360° aerial threats and contributes, in peace-time or during a crisis, not only to the protection of national territory, but also to the protection of forces engaged in overseas operations and mobile ground forces.

Key specifications

- Engagement scope over 100 km
- Significant fire-power (8 Aster 30 Block 1 supersonic missiles per launcher)
- Reduced crew

Major advantages

- No blind zone at zenith
- Rapid deployment and high mobility
- NATO interoperable
- Air-transportable
